**INSTALLATION GUIDELINES**

(80% PORT PLUG VALVES)

- **80% PORT ECCENTRIC PLUG VALVES**

  - **AWWA C517**
  - **3”–12” — 175 PSI**
  - **14”–24” — 150 PSI**
  - **FLANGED AND MECHANICAL JOINT END CONNECTIONS AVAILABLE**

**FLOW**

- When Eccentric Plug Valve is installed in a horizontal line, the preferred installation is with the plug rotating 90° upward to open. Utilizing this orientation can lessen the effect of solids preventing plug operation.

**FLOW**

- Eccentric Plug Valves may be installed vertically; however, whenever possible, horizontal orientation is preferred.

**FLOW**

- In low pressure/low flow systems with solids present, install valve with flow against plug face.

**FLOW**

- When installed in a vertical line where solids exist, the seat is ideally positioned up, preventing solid build up in the valve body.

**FLOW**

- When installed in high pressure systems, it is recommended to have the plug seat on the outlet side of the valve.

**FLOW**

- Eccentric Plug Valves may be installed vertically; however, whenever possible, horizontal orientation is preferred.

---

Kennedy Valve Plant & Industrial, A Division of McWane, Inc.
THE KENNEDY VALVE 80% ECCENTRIC PLUG VALVE

WITH A PROVEN DESIGN, THE KENNEDY VALVE 80% PLUG VALVE HAS ESTABLISHED ITSELF IN THE MARKETPLACE AS A RELIABLE AND ENGINEERED PRODUCT. OVER MANY YEARS, THE DESIGN HAS PROVEN DEPENDABLE IN A VARIETY OF SERVICE APPLICATIONS.

APPLICATIONS
- Wastewater Service
  - Lift Stations
  - Heavy Solids
  - Slurries/Grit
- Water Services
- Pump Service
- Throttling/Modulating/Control/Balancing
- Vertical Piping Applications
- Where Positive Shutoff Required

RECTANGULAR PORT DESIGN
The cylindrical plug and rectangular port provide a rotational alignment by the eccentric motion making a uniform and full contact with the welded in nickel seat. Unlike circular port designs that have a point-to-point seating where engagement and wear can be an issue, the rectangular port makes a uniform and full contact without the need for exact alignment of the plug in the body.

ACTUATION
Kennedy Valve has furnished valves with many assorted type of actuators to operate our valves. Our engineers have extensive experience with electric, pneumatic, and hydraulic actuators on our plug valves and regularly work with most major actuator suppliers.

Cv = Q / ∆P

Q = Rate of flow in GPM

∆P = Differential pressure (psi) between two points

Cv = Flow coefficient

ACCESSORIES AND OPTIONS
A full line of accessories and options are available that include extension stems, extended bonnets, floor stands, valve boxes, operating nuts, hand wheels, levers, positioners, fully bi-directional rating, switches, and solenoid valves as well as speed control valves.

POSITION INDICATOR
Quarter-turn valves are equipped with a position indicator marked at 10° increments.
